

Optical Components

DUV-VIS-IR Applications

德硅凯氟
DESIOPTOE

DESIOPTOE can provide various types of optical fabrication, such as grinding, polishing, and coating. **DESIOPTOE** not only provides CaF_2 crystal ingots and blanks but also customized optical components.

Processable materials	Finished
Fluoride crystal CaF_2 , BaF_2 , MgF_2 , LiF	
Laser crystals	Blade cutting Wire cutting
Infrared Material Zinc selenide Chalcogenide glass Sapphire Silicon Germanium	Fine grinding Fine polishing Reflective coating Anti-reflective coating
Fused silica JGS1, JGS3 (OH< 1 PPM)
